Disposable SpO2 Sensors

KTMED's DS series of disposable sensors are ideal for long-term monitoring or situations where the risk of contamination is high. These single-use sensors are available for patients of all sizes (adult, pediatric, infant and neonate).

Features

- High accuracy at critical SpO2 levels
- High-quality shielded cable
- Easy application for clinicians or patients
- Competitive prices with effective performance
- Compatible with Nellcor and BCI

DS-01 : Adult

DS-02 : Pediatric

DS-03 : Multisite
(Neonate, Infant, Pediatric, Adult)

DS-04 : Clip-Multisite
(Neonate, Infant, Pediatric, Adult)
